Professional Experience

Software Engineer, Exabyting Technologies (April,20 - Current)

Exabyting is a prominent partner of **bKash Limited**. bKash is one of the leading *Mobile Financial Services Providers in Bangladesh*. I have been working with the *Solution Engineering team at bKash HQ* as a Software Engineer since my joining.

Stack: Java, Spring Boot, Thymeleaf, jQuery, MySQL, DynamoDB

Work Highlights

[Saving-DPS](#)

A feature for **bKash App** which allows customers to open and maintain a DPS account under a bank. I worked on core business logic, implemented multiple APIs, Notification, Designed Web admin configuration, etc.

Technologies: Java (Spring-Boot), JS, DynamoDB, AWS, Docker

App link: <https://play.google.com/store/apps/details?id=com.bKash.customerapp>

[Multibank](#)

An Internal Core Web Application of **bKash Limited**.

Implemented SFTP inbound, Report generation, Email Service, Search feature and Several Configuration, worked on Frontend.

Technologies: Java (Spring-Boot), JS, MySQL, Docker

[bKash-Report-Portal](#)

An Internal Web Application of **bKash Limited** for generating numerous complex reports.

Technologies: Java, JS, MySQL, Oracle

[bKash-Personal-Retail-Account](#)

This is an account for small traders and online-based entrepreneurs, through which an account can be opened very easily and payments can be taken from customers for providing goods and services.

Technologies: Java (Spring-Boot), JS, MySQL, Docker

Professional Skills

Java	Spring Boot	MySQL	DynamoDB	JPA	Hibernate	REST API
Thymeleaf	HTML	CSS	Bootstrap	Linux	Bash	Postman
JIRA	jQuery	JavaScript	Docker	Kubernetes		

Personal Projects

Coronavirus-Tracker

A Coronavirus tracker app using **Java** and **Spring Boot**. This application lists the current number of cases reported across the globe.

Link: <https://github.com/Saimon2323/coronavirus-tracker>

E-Market-Place

A Multi-vendor e-commerce website.

Technologies: PHP, JavaScript, MySQL

Link: <https://github.com/Saimon2323/E-Market-Place>

Chatting App

A small chatting application using PHP and JavaScript.

GitHub: https://github.com/saimon2323/Chatting_app

Thesis

Plant disease classification and visualization using Convolutional Neural Network.

The main goal of this work is to develop a machine learning-based effective and error-free disease prediction system which will predict tomato diseases and help farmers to take necessary steps.

Technologies: Python, Keras and Google Co-Lab.

Leadership

BoiBhandar.com – Online-based bookselling & renting a shop.
